SUMMARY

I'm passionate about Development, and bring my dedication, knowledge, and belief in both flexibility and teamwork to the table. Looking for a Full Stack position to enhance my skills and learn best practices within the development space.

TECHNICAL SKILLS

Python, Javascript, SQL, Node, React, Express, BeautifulSoup, Bootstrap, HTML, CSS, Git, Linux

EXPERIENCE

Snapland, Tel Aviv Israel 2022-currently

- Using python with BeautifulSoup I scraped government sites and added the data to the database on a robotic scale.

Tools include: Python, BeautifulSoup, SQL, Slack, Click Up.

Tier 2 Tech Support, Techloq, Jerusalem, Israel 2021-currently

Customer Support (Team Lead)

- Managed production infrastructure, rerouting IPs, train clients dealing with ssl, add certificate to programs using the bash file down below, also run sc queries
- Conduct triage to determine the customer's needs (application maintenance, user training)
- Use Teamviewer for maintenance including application uninstall/reinstall, clean up temp folders.

Employee Training

- How to conduct triage
- Best practices in working with customers

Tools include: Powershell, VmWare, Tcp, Dev tools, Gray logs, Slack, Teamviewer, Salesforce.

Sunshine Magazine, Beit Shemesh Israel 2020-2021

- Logistics Manager, coordinating and implementing distribution

Operations Coordinator, Agudah Yisroel of Illinois, Chicago IL. Summer 2013 - 2017

- Planned and implemented events
- Supervised staff
- Lead campers as counselor, mentored them in sportsmanship and teamwork

TECHNICAL PROJECTS

Techloq Certificate Installer - [GitHub](#)

- This program was written in bash to install Techloq certificate to various programming packages such as java pip npm.

Crypto Trading Platform - [GitHub](#) - [Demo](#)

- Users can create an account, log in, and trade cryptocurrency. I Built a server using Node JS to handle backend activities and database integration.
- Created a database with Postgres for storing analytics data

Compare Phones - [GitHub](#) - [Demo](#) - [Live Website](#)

- This is a FullStack application using React that calls an API to retrieve phone specs, stores the data with hooks, and displays on the page with a nested map loop.
- Utilized SQL to hold database of users, and Express for backend server

ToDo List - [GitHub](#)

- Developed a classic Todo List using HTML
- Utilized localStorage to transfer objects between HTML

EDUCATION

Developers Institute	Full Stack	2022 Jun-Sep
Nachalas Yisroel Yitzchok	Talmudic Studies	2018-2022
Ohr David	Talmudic Studies	2015-2018
