SUMMARY

I'm ambitious, passionate about computer programming, and striving every day to be the best developer possible. I will be an asset to any project I work on, bringing my dedication, knowledge, and compatibility with others to the table. Looking for a Full Stack JavaScript position to enhance my skills and learn best practices within the programming space to foster professional growth.

TECHNICAL SKILLS

Javascript, SQL, Node, React, Redux, Express, Git, Linux, Bootstrap, HTML, CSS.

TECHNICAL PROJECTS

Crypto Trading Platform - GitHub - Demo
- Users can create an account, log in, and trade cryptocurrency (which we provide at sign up). I developed this with a teammate at the beginning of my coding bootcamp as a bootcamp hackathon.
- Built a server using Node JS to handle backend activities like sending and retrieving information from the database.
- Created a database with Postgres for storing relevant data as well as data that may be used for analytical purposes.

Compare Phones - GitHub - Demo - Live Website
- This is a FullStack application using React that calls an API to retrieve phone specs and it stores the data with hooks then displays on the page with a nested map loop.
- Utilized SQL to hold my database of my users and Express for the backend server

ToDo List - GitHub
- I developed a classic Todo List using two html pages one to take the input the other to display the list
- Utilized a localStorage to transfer an object holding the Todo List between pages

---

EXPERIENCE

Tier 2 Tech Support, Techloq**,** Jerusalem, Israel   2021-current
Customer Support (Team Lead)
- Conduct triage to determine the customer's needs (application maintenance, user training)
- Use Teamviewer for maintenance including application uninstall/reinstall, clean up temp folders, rerouting IPs, train clients dealing with sll, add certificate to programs through cmd, run sc queries

Employee Training
- How to conduct triage
- Best practices in working with customers

Tools include: Tcp, Dev tools, Gray logs, Slack, Teamviewer, Salesforce,

Sunshine Magazine, Beit Shemesh.Israel   2020-2021
- Logistics Manager, coordinating and implementing distribution

Operations Coordinator, Agudah Yisroel of Illinois, Chicago IL.   Summer 2013 - 2017
- Planned and implemented Events
- Supervised staff
- Lead campers as counselor, mentored them in sportsmanship and teamwork
